Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-5, 8-11 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Peter (US Patent 4,746,051).

Peter discloses a method and apparatus for controlling ultrasonic welding. The ultrasonic welding system comprises power supply 10, conductor 24, converter 26, transformer 30, booster 46, horn 48 with welding tip 50, anvil 60. The control system for this ultrasonic welder comprises conductor 64 applied to a voltage to frequency converter 66. When the voltage on conductor 64 exceeds the voltage provided by threshold reference source 76, the comparator 74 develops an output signal, which is applied to conductor 78 to de-energize the welding system.

Regarding claim 14, the applicant is reminded that the materials worked upon are not germane to the patentability of an apparatus claim. In particular, the concept of surface welding with energy directors is not given patentable weight by the examiner.

Claim Rejections - 35 USC § 103

Art Unit: 1734

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peter as described above in view of Pierson (US Patent 4,865,687).

Pierson discloses an ultrasonic welding system in which tip 18 of ultrasonic horn 14 welds spherical rivet 10 to join thermoplastic substrate 12 to part 20. It would have been obvious to one having ordinary skill in the art to rivet weld materials, as taught by Pierson, in the method and apparatus of Peter described above in order to weld materials of various shapes and configurations.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13, line 2, the phrase "is chosen larger that is at least necessary for carrying out the processing" is indefinite and needs to be rephrased.

Art Unit: 1734

Allowable Subject Matter

7. Claims 2-3 and 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
